Team ID	xxxxxxx
Project Name	Human Development Index(HDI) Predictor
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	- Collects HDI-related data. - Uploads the dataset - Checks data quality.	- Runs the prediction model. - Reviews predicted HDI values. - Validates the results.	- Uses prediction results. - Makes development decisions - Plans improvement strategies.
Touchpoint <i>What part of the service do they interact with?</i>	- Data upload page. - Dataset repository. - Input forms.	- Prediction dashboard. - Machine learning model. - Results screen.	- Reports dashboard. - Analytics charts. - Decision support system.
Customer Thought <i>What is the customer thinking?</i>	- Is my data complete? - Will the data be accurate? - Is everything uploaded correctly?	- Will the model predict accurately? - Are these results reliable? - Which factors affect HDI the most?	- How can these results improve development? - What actions should be taken? - Can these insights help policymakers?

Customer Feeling <i>What is the customer feeling?</i>	Curious, focused, and hopeful.	Excited but slightly uncertain.	Confident, satisfied, and motivated.
Process Ownership <i>Who is in the lead on this?</i>	Data Analyst	Machine Learning System	Government Policymaker / Development Analyst
Opportunities <i>(How can we improve this stage?)</i>	• Improve data validation. • Simplify data upload. • Support multiple file formats.	• Increase prediction accuracy. • Display feature importance. • Reduce processing time.	• Provide interactive dashboards. • Offer policy recommendations. • Generate downloadable reports.
