Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the HDI Prediction System that sends or receives data (e.g., Data Analyst, Government Data Sources (WHO, World Bank, UNDP), Policymaker).
Rectangle with numbered header	Process	An activity that transforms input data into output data (e.g., Validate Input Data, Predict HDI, Generate Reports, Decision Support).
Rectangle (solid fill, no number)	Data Store	A place where data is stored for later use (e.g., HDI Dataset, Trained ML Model, Prediction Results Database).
Labeled arrow	Data Flow	The movement of data between external entities, processes, and data stores, labeled with the type of data being transferred (e.g., Input Dataset, Validated Data, Predicted HDI, Reports, Insights).

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
