

Problem-Solution Fit

Date	04 july 2026
Team ID	xxxxxx
Project Name	Human Development Index(HDI)Predictor
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1. CUSTOMER SEGMENT(S) [CS] Government organizations, policymakers, researchers, students, NGOs, economists, and development analysts.	6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES [CL] Limited budget, lack of advanced analytical tools, limited technical knowledge, internet availability, and device compatibility.	5. AVAILABLE SOLUTIONS PROS & CONS [AS] Pros: UNDP reports, World Bank data, online datasets provide reliable information. Cons: Mostly historical data, manual analysis required, limited prediction capabilities, not interactive.
2. PROBLEMS / PAINS + ITS FREQUENCY [PR] Difficulty analyzing HDI data, manual comparison of countries, inaccurate forecasting, and time-consuming analysis. These problems occur frequently when preparing reports or making policy decisions.	9. PROBLEM ROOT / CAUSE [RC] Lack of automated HDI prediction, scattered data sources, manual calculations, difficulty identifying development trends, and limited visualization tools.	7. BEHAVIOR + ITS INTENSITY [BE] Users frequently search for HDI information, compare countries, analyze development indicators, and generate reports. Intensity: High during research and planning.

3. TRIGGERS TO ACT [TR]

Need for quick HDI predictions, policy planning, research, country comparisons, and data-driven decision-making.

4. EMOTIONS

BEFORE / AFTER [EM]

Before: Confused, frustrated, time-consuming analysis.

After: Confident, informed, faster decision-making, better understanding of HDI trends.

10. YOUR SOLUTION [SL]

Develop an AI/ML-based HDI Predictor that predicts Human Development Index using socioeconomic indicators, provides interactive visualizations, enables country comparisons, and supports data-driven decision-making through a user-friendly web application.

8. CHANNELS OF BEHAVIOR [CH]

ONLINE

Online: Web applications, government websites, UNDP portal, World Bank, research portals.

OFFLINE

Offline: Educational institutions, government offices, research organizations, seminars.
