

Solution Architecture

Date	04 july 2026
Team ID	xxxxxxx
Project Name	Human Development Index(HDI) Predictor
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
<i>Presentation Layer</i>	<i>Provides the web interface where users upload data, view predictions, and access reports.</i>	<i>HTML, CSS, JavaScript</i>
<i>API Gateway</i>	<i>Receives user requests, processes them, and communicates with the machine learning model.</i>	<i>Flask</i>
<i>Microservices / Core Logic</i>	<i>Performs data preprocessing, executes the ML model, predicts HDI, and generates reports.</i>	<i>Python, Scikit-learn, Pandas, NumPy</i>
<i>Database / Data Layer</i>	<i>Stores HDI datasets, trained models, and prediction results.</i>	<i>CSV Files, Pandas Data Frames</i>
